WEEK 2

Dental hygienists and dental hygiene technicians have your children's dental health at heart.

To have beautiful healthy teeth, I brush them often!

Dear parents,

I am a dental health professional who works in your child's elementary school. To ensure a beautiful healthy smile, I encourage you to help your child get into the habit of brushing his or her teeth every morning after breakfast and every evening before bed.

Together, to help your child develop good habits for life!

Calendar

I offered your child a calendar to help develop a daily brushing routine. Encourage him to colour in the corresponding tooth on the calendar each time he brushes. Your child can then picture his efforts. In the evening, I suggest that you help your child brush his teeth, to ensure effective brushing.

Dental hygienists and dental hygiene technicians have your child's smile at heart!
